1. Applicant's election of Group I (claims 1-9 and 11-14) in the reply filed on October 28, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

***Reason for Allowance***

2. The following is an examiner's statement of reasons for allowance:

The present invention pertains a verifying apparatus for a liquid crystal driving circuit and a method thereof, having a plurality of driving stages. The prior arts, however, do not teach a verifying apparatus for a liquid crystal driving circuit having features of receiving a trigger pulse by a storage unit, checking to determine if the trigger pulse transmitted via the storage unit is normal or not, setting the output terminal of the verifying apparatus to a pre-defined logic potential if the trigger pulse transmitted from the storage unit is found to be abnormal, and executing a logic operation that correspond to the pre-determined logic potential so that the result from the logic operation is unaffected by the pre-defined logic potential. Hence, the prior arts of record do not anticipate nor render obvious the claimed inventions. Thus, claims 1-9 and 11-14 are allowable over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
